*Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I Claims 1-37, drawn to a method of applying therapeutic ultrasound to a location within a body, classified in Class 601, subclass 2.

Group II Claims 38-41, drawn to an apparatus for delivering ultrasound into a body, classified in Class 600, subclass 437.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice a diagnostic method such as imaging.

Because these inventions are distinct for the reasons given above and the search required for the Group II is not required for Group I restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

If applicant elects the invention of Group I, applicant must also respond to the following election of species requirement.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- 1) the species which uses an **invasive** ultrasound probe for delivering therapeutic ultrasound into the body;
- 2) the species which uses a **non-invasive** ultrasound probe for delivering therapeutic ultrasound into the body;

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth S. Smith whose telephone number is (703) 308-3063.
